SUMMARY

Full-stack software & web developer with three years of professional experience. After graduating from CodeClan, I have worked with small companies to amplify and improve their internal systems and client-facing websites. I'm proficient in React, Next.js, TypeScript, Wordpress, and modern styling frameworks including SCSS, Tailwind, and MUI for building responsive, accessible frontend applications. On the backend, I am skilled with Node.js, Express, and databases like PostgreSQL and MongoDB. I have experience integrating third-party software across platforms such as Stripe, Zapier, Telegram, and OpenAI. I understand the importance of modular, clean code, knowing when to reuse existing solutions versus creating new features, to build maintainable and scalable applications.

TECHNICAL SKILLS

Frontend:	React Next.js TypeScript JavaScript HTML5 CSS/SASS Tailwind CSS MUI
Backend:	Node.js Express NPM Third-Party Integrations (Stripe, Zapier, Telegram, OpenAI)
Databases:	PostgreSQL MongoDB
